Heartland

Bill Pay Virtual Terminal

Turn your PC into a card terminal.

Bill Pay Virtual Terminal lets you accept payments anywhere with an internet connection. With no hardware and software to install, it's easy to use — and you can start taking payments quickly. Accept all major payment types, including ACH, with any web browser and on any device.

Why Bill Pay Virtual Terminal?

No hardware. No problem.
Manually enter card payments with any web browser.

Accept all major payment types.
EMV chip cards, magstripe, contactless and ACH.

Add the latest hardware.
Connect certified Android devices, including the
PAX A920 and A80, with a WebSocket connection.

Create a better checkout experience.
Add, delete, modify, search and store payment methods
for customers.

Catalog every payment.
Accept payments and search for bills from your computer.

Run your business better.
With the Bill Pay Virtual Terminal Device Manager, you
can add, delete and manage multiple terminal devices.
